WHY HOME ASSISTANT · PRE-INSTALLED · ON YOUR HOME NETWORK

Your plunge, and every smart thing in your home, in one app.

Cold Plunge Control Pro
WORKING NAME · CONCEPT

Cold Plunge Control Pro comes with Home Assistant already installed and the Control Freak integration already connected. You get everything people love about it, without the setup. Just plug it in.

One app. No more app juggling.

How many apps do you open today? Home Assistant puts your plunge and the rest of your smart home in one place, so you have one app to check and one to control.

Your brands finally work together

Home Assistant works with over 1,000 brands through 1,500+ integrations. Lights, plugs, thermostats, locks, speakers and cameras you already own can finally talk to each other.

Works when the internet doesn't

It runs on the controller on your home network, never cloud Home Assistant, so it answers right away and keeps working when the internet is down. Your data stays home.

Ask, don't open

Ask Alexa what the status is, tell Google to adjust the temperature, or use Siri through HomeKit, and get automated voice alerts when something is out of balance.

Peace of mind, all over the house

Anything your plunge knows can set off something else: lights, speakers, thermostats and alerts on every phone. A few ideas are below.

Nobody can switch it off

Your setup lives in your home, not on a company's server. Home Assistant is open source, and run by a non-profit that can't be sold. Control Freak adds no subscription.

IDEAS YOU CAN BUILD IN HOME ASSISTANT · EXAMPLES WITH YOUR OWN DEVICES

IDEA · EXAMPLE

Alarm set for 6:00

Ready-by follows your morning: the water is at target by 6:30.

IDEA · EXAMPLE

"Alexa, is the plunge ready?"

Hear the water temperature before you head outside.

IDEA · EXAMPLE

Out of the plunge

The bathroom floor heat comes on, so you warm up after.

Home Assistant figures: home-assistant.io, October 2026. Home Assistant is a trademark of the Open Home Foundation. Your lights, speakers and thermostat aren't in the box.
