HOW IT ALL CONNECTS · CONCEPT

A reef controller that plugs together.

Sensors in, power out, one controller in the middle. Scan the QR code and you're set up in minutes.

CONTROL FREAK

8 SWITCHED OUTLETS IN THE POWER HUB

3 DOSING HEADS (PRO)

0 SUBSCRIPTIONS

Safety rules don't depend on Home Assistant — Control Freak's own safety rules — heater cutoff, top-off lockout and leak shutoff — keep running on the controller, even if Home Assistant stops.

Works with the Control Freak gear you already own: every Control Freak product is a complete kit on its own. If a Control Freak controller you already have has a free port or relay, Home Assistant can put it to work for this product too.

Numbers: Reef Control Pro public brief, October 2026. Concept illustration, not to scale; equipment you already own is drawn dashed.
